By email to: [Ken.Little@edpr.com](mailto:Ken.Little@edpr.com)

Dear Mr. Little,

The Ministry of the Environment, Conservation and Parks (MECP) has reviewed the following document which was submitted pursuant to Condition R1 of Renewable Energy Approval (REA) No. 0871-AV3TFM, issued on May 4, 2018:

*Nation Rise Wind Farm Limited Partnership – REA Condition R1 – Geotechnical Scope of Work, dated December 21, 2018.*

This is to confirm that the MECP is satisfied with the above-noted document. While the above-noted document is missing the details of analysis and recommendation, these are to be included in the supplementary detailed investigation report.

EDP Renewables Canada Ltd. is reminded:

- that in accordance with Condition R1 of the REA, construction of individual turbine foundations and access road shall not commence without the written approval of the Director of the supplementary detailed geotechnical investigation report
- to ensure that prior to construction of the facility, it obtain all necessary construction-related permits from appropriate agencies and satisfy all other relevant conditions of the REA which may otherwise prohibit the commencement of construction.

Yours sincerely,

Mohsen Keyvani  
Director, Section 47.5 Environmental Protection Act  
MECP, Environmental Assessment and Permissions Branch
