

Eagle Creek Solar Park

Saginaw County, Michigan

The Eagle Creek Solar Park will be located in Saginaw County, west of the town of St. Charles, in Fremont Township. Its namesake, Eagle Creek, flows nearby. The solar park will complement the area's agricultural resources, providing farmers with a stable, weather-resistant cash crop in the form of landowner lease payments. Eagle Creek Solar Park will also generate millions of dollars in payments to local governments through the life of the project, benefiting schools, health and fire departments, and the townships and county.

120 MW
ESTIMATED COMMERCIAL
OPERATION DATE **2025**

Eagle Creek Solar Park's generation will be equivalent to the average consumption of more than **33,000 Michigan homes**.¹

Eagle Creek Solar Park will save more than **152 million gallons** of water each year and prevents the air pollution that causes smog, acid rain, and climate change.²

Economic Benefits

CAPITAL INVESTMENT
\$250 million

\$30 million
WILL BE PAID TO LOCAL GOVERNMENTS

\$68 million+
WILL BE PAID TO LANDOWNERS

Millions of dollars
WILL BE SPENT LOCALLY

Multiple permanent jobs
WILL BE CREATED

Hundreds of construction jobs
WILL BE CREATED

About us

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms, solar parks, and energy storage systems throughout North America. Headquartered in Houston, Texas, with 60 wind farms, 13 solar parks, and eight regional offices across North America, EDPR NA has developed more than 10,100 megawatts (MW) and operates more than 9,100 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.

EDPR NA is a wholly owned subsidiary of EDP Renewables (Euronext: EDPR), a global leader in the renewable energy sector. EDPR is a global leader in renewable energy development with a presence in 28 regions in Europe, North America, South America and Asia-Pacific. With headquarters in Madrid and leading regional offices in Houston, São Paulo and Singapore, EDPR has a sound development portfolio of top-level assets and market-leading operating capacity in renewable energies. Particularly worthy of note are onshore wind, distributed and large-scale solar, offshore wind (OW - through a 50/50 joint venture), and technologies to complement renewables such as storage and green hydrogen.

EDPR's employee-centered policies have received recognition such as Top Workplaces 2023 in the USA, Top Employer 2023 in Europe (Spain, Italy, France, Romania, Greece, Portugal and Poland) Colombia and Brazil, and are also included in the Bloomberg Gender-Equality Index.

EDPR is a division of EDP (Euronext: EDP), a leader in the energy transition with a focus on decarbonization. Besides its strong presence in renewables (with EDPR and hydro operations), EDP has an integrated utility presence in Portugal, Spain and Brazil including electricity networks, client solutions and energy management.

EDP - EDPR's main shareholder - has been listed on the Dow Jones Index for 16 consecutive years, recently being named the most sustainable electricity company on the Index.

For more information, visit www.edpr.com/north-america.

Eagle Creek Solar Park will consist of state-of-the-art, **bifacial tracking PV panels on a site of approximately 830 acres.**

Power generated at Eagle Creek Solar Park will support **Michigan's electric grid.**

Eagle Creek Solar Park will **contribute to the national energy security** for the state of Michigan and the United States, helping diversify domestic supply.

Solar energy accounted for **48% of all new electricity generating** capacity added to the US grid through the first three quarters of 2023.³
