

Gabriel Yamal

Executive Vice President, Central
& Western Regions, Mexico, and
Energy Storage

Gabriel Yamal serves as the Executive Vice President of EDP Renewables North America (EDPR NA) for the Central & Western Regions, Mexico, and Energy Storage. Gabriel and his team lead the company's development of wind, solar, and storage projects in CAISO, WECC, ERCOT, SPP, MISO, and Mexico.

Gabriel has more than 18 years of experience in the energy industry and has focused on renewables for the past 16 years. He joined Horizon Wind Energy, now EDPR NA, in 2008 and has held various positions in multiple functions, including Risk & Markets, Finance, CapEx Estimation, Business Development, Project Management Organization, and Development. In 2014, he led EDPR NA's entrance into Mexico, where he founded a regional office for the company, built a local team, and led the development, PPA contracting, and execution of 500 megawatts (MW) of wind and solar projects. In 2021, his role expanded to include responsibility for development activities in the Western Region as well as for energy storage business development strategy.

Prior to joining EDPR NA, Gabriel worked in midstream gas consulting at Black & Veatch. Gabriel graduated from Rice University, majoring in Mathematical Economic Analysis and Statistics.

About EDP Renewables North America

EDP Renewables North America LLC (EDPR NA), its affiliates, and its subsidiaries develop, construct, own, and operate wind farms, solar parks, and energy storage systems throughout North America. Headquartered in Houston, Texas, with 61 wind farms, 18 solar parks, and eight regional offices across North America, EDPR NA has developed more than 11,200 megawatts (MW) and operates more than 10,200 MW of onshore utility-scale renewable energy projects. With more than 1,000 employees, EDPR NA's highly qualified team has a proven capacity to execute projects across the continent.
